

OUTSCALE Business Experience

**EMPOWERING
SECURE DIGITAL
INNOVATION**

OUTSCALE Business Experience is a suite of industry-specific, AI-driven solutions, enhancing efficiency and ensuring regulatory compliance in different industries.

Boost your organization's performance leveraging virtual worlds to amplify and enrich real-world capabilities.

User Experience

Empower every user with the right solutions that streamline processes and catalyze innovation, driving collaboration and knowledge sharing.

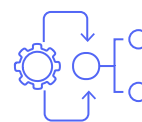

Sector-Specific Applications

Tailored applications designed to meet the unique challenges of your industry.

Enhanced Security

Secure your sensitive data with AI services, trained and delivered on a sovereign and secure Cloud. Take control and ensure your information remains safe.

AI-Driven Solutions

Automate document generation, streamline tasks with specialized algorithms, extract essential data from various sources, and enable predictive analysis and process simulations.

Amplify your operational efficiency with solutions tailored to meet your specific business needs through process automation, AI and sovereign Cloud, on a single platform:

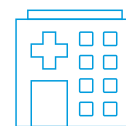

FOR FINANCIAL SERVICES:

- Fund compliance
- Fund regulatory information (e.g. SFDR, PRIIPS...)
- Augmented audits

FOR PUBLIC SECTOR:

- Carbon footprint optimization of IT Services
- HR documentation automatization
- Reduction of energy consumption of large public buildings

FOR HEALTHCARE:

- Care path management
- Conformity of hospital's documentation

With OUTSCALE
Business Experiences,
leverage AI algorithms
within solutions tailored
for business-specific
challenges.

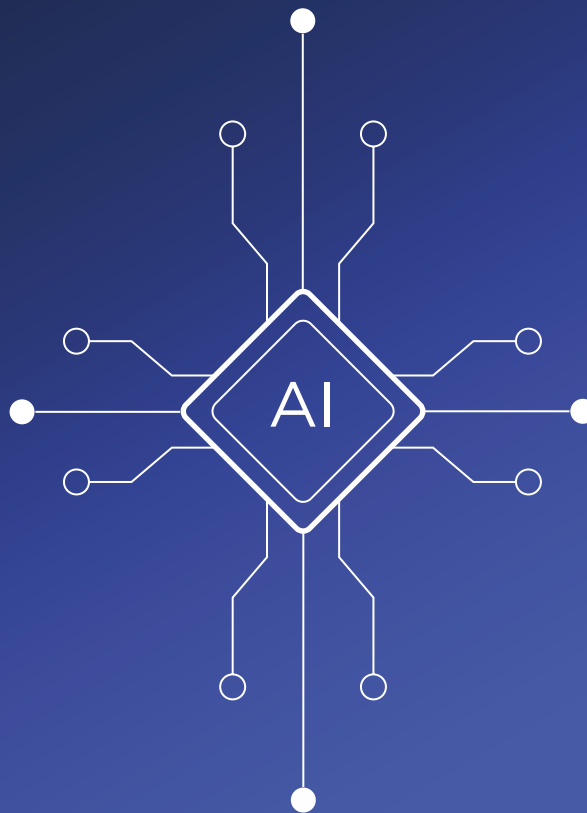

Automate

Capture know-how and train specific algorithms to make the AI perform tasks on its own and thus reduce workloads for your collaborators.

Generate documents

Automatically generate contents based on input data collected in your organization.

Search and synthesize data

Parse multiple documents to retrieve specific information that will be consumed by different business processes.

Simulate and predict

Use data history to identify repetitive patterns and predict results to simulate actions and processes.

“

The sovereign cloud aims to enable French and European organizations, particularly governmental institutions and strategic companies, to store and process their sensitive data securely and reduce dependence on foreign providers by offering a sovereign alternative. Sovereign SaaS solutions in Regtech, Legaltech, or Complitech, based on a secure cloud, can assist them in complying with regulations while enhancing their competitiveness.

”

Rui Jorge Lopes

EMEA Manager, OUTSCALE

**Empower the future of your organization with
OUTSCALE Business Experiences: tailored, secure, AI-powered
solutions for unparalleled efficiency and innovation.**
