

OUTSCALE EXPERIENCES

Digital sovereignty and artificial intelligence take center stage at OUTSCALE's 11th edition

Saint-Cloud, June 5, 2025 – For its 11th edition, OUTSCALE, a Dassault Systèmes brand, places the theme of “sovereign experience” at the center of its annual event dedicated to artificial intelligence and European digital autonomy. OUTSCALE reaffirms its pioneering role for institutions and enterprises prioritizing data security, performance, and control by unveiling key announcements:

- **Mistral AI's Chat: the enterprise AI assistant in sovereign mode**
- **Mistral AI's “La Plateforme” on OUTSCALE cloud: when enterprise AI becomes fully sovereign**
- **OUTSCALE Kubernetes as a Service: enhanced performance, resilience, and large-scale sovereignty**
- **Quantum as a Service (QaaS) paves the way for the future of technology**
- **OUTSCALE x PariSanté Campus partnership: a catalyst for digital health innovation**

Mistral AI's Chat: the enterprise AI assistant in sovereign mode

Starting in September 2025, OUTSCALE will expand its sovereign cloud (certified SecNumCloud 3.2) with “Le Chat,” Mistral AI's multilingual assistant. Available via the OUTSCALE Marketplace, “Le Chat” brings together data, tools, and teams in a single interface, automating the generation of reports, marketing content, and code. It reduces repetitive tasks and significantly lowers error risks.

With native autoscaling, “Le Chat” automatically adjusts its compute resources to the workload, ensuring performance and cost control. Uniquely available on a SecNumCloud 3.2-certified cloud, it provides full control of the AI stack and full compliance with confidentiality and security standards.

Optimized for business, marketing, finance, HR, data science, and engineering, “Le Chat” combines Mistral AI's generative power with OUTSCALE's sovereignty to accelerate innovation, boost team agility, and preserve organizational competitiveness.

Mistral AI's "La Plateforme" on OUTSCALE cloud: when enterprise AI becomes fully sovereign

OUTSCALE and Mistral AI launch Mistral AI's "La Plateforme" available through OUTSCALE Marketplace and hosted on SecNumCloud 3.2-certified sovereign infrastructure. The result of an industrial partnership between Dassault Systèmes and Mistral AI, this unique service provides access to a catalog of open source and "close weights" models optimized to cut GPU consumption by up to half.

Enhanced with industry-specific layers such as Document AI OCR and Code Assistant, it combines the elasticity of public cloud with built-in security controls. "La Plateforme" gives companies and institutions immediate agility to deploy and manage AI use cases.

Operational as of September 2025, "La Plateforme" on OUTSCALE delivers reinforced security, performance optimization, and complete control, supported by OUTSCALE and Mistral AI experts.

"Digital sovereignty is not an option, it's an imperative. OUTSCALE, a Dassault Systèmes brand, anticipated this by building a sovereign cloud infrastructure meeting the highest standards, designed for the most critical industries and institutions. In a fast-changing market, organizations are realizing the urgency of regaining control over their data. Sovereignty is not opposed to non-European solutions, it complements them by ensuring control over strategic applications and the most sensitive information," **said Philippe Miltin, CEO, OUTSCALE, Dassault Systèmes.**

OUTSCALE Kubernetes as a Service: enhanced performance, resilience, and large-scale sovereignty

OUTSCALE Kubernetes as a Service (OKS) offers each enterprise a dedicated and isolated Kubernetes cluster, deployable in minutes, with no risk of noisy neighbors. Fully CNCF open source compatible, it combines public cloud elasticity with the ease of a managed service. Hosted on SecNumCloud 3.2-certified public cloud infrastructure, it ensures sovereignty and confidentiality, even in highly regulated industries.

- Greater resilience with Multi-AZ and high availability

Following its March 2025 launch, OKS now supports Multi-AZ across two European regions (one SecNumCloud 3.2 certified). Each cluster is automatically distributed across three zones, ensuring service continuity with SLAs up to 99.95%. Control planes and workloads are fully duplicated, with VPC isolation and encrypted volumes for maximum protection.

- Scalability and performance from September 2025

From September, OKS will introduce cross-AZ autoscaling, automatically adjusting compute and storage to workload demands. Pods will be evenly distributed across the three zones, optimizing resources and costs, offering peak agility during traffic surges.

With OUTSCALE Kubernetes as a Service, businesses and institutions gain a managed Kubernetes solution that delivers sovereignty, resilience, and performance, ready for the most critical applications.

Quantum as a Service (QaaS) paves the way for the future of technology

With the rise of quantum computing and the sovereignty challenges it presents, OUTSCALE is launching “Quantum as a Service” Europe’s first fully sovereign quantum offering with noise-free computation thanks to its built-in error correction algorithm.

Designed to address future challenges, QaaS opens new opportunities for organizations by enabling:

- **Low-risk access to emerging tech:** QaaS reduces the risks of premature investment and allows progressive skill-building on quantum use cases via managed test environments.
- **Innovation in solving complex problems:** Quantum algorithms can address problems that traditional computers struggle with, such as cryptography.

Available in beta starting November 2025 in OUTSCALE data centers, this “as a Service” solution allows enterprises and institutions to embrace the new paradigms of quantum algorithm development, without relying on foreign infrastructure, while enjoying 24/7 access.

OUTSCALE x Parisanté Campus: a new catalyst for health innovation

OUTSCALE and Parisanté Campus today announce a partnership to support and accelerate the development of digital health startups in France and across Europe. Leveraging OUTSCALE’s cloud and AI expertise compliant with both SecNumCloud and HDS requirements, this partnership makes OUTSCALE the sovereign tech foundation for the ecosystem.

“Using cloud and AI tools is now strategic for the development of health innovation projects. With OUTSCALE, we provide startups with a unique environment - sovereign and highly secure - to explore and deploy their solutions,” said Professor Antoine Tesniere, CEO of Parisanté Campus. “This partnership reflects our shared ambition to foster the next generation of French health unicorns and accelerate major transformations of our healthcare system.”

The partnership includes a privileged pathway through the OUTSCALE for Entrepreneurs program: rigorous startup selection, expert mentoring, and dedicated cloud credits. Joint events, workshops, and on-campus activations will facilitate networking between entrepreneurs, researchers, and institutional actors.

“Our goal is clear: to support digital and AI health innovators with high-performance, sovereign cloud and AI services that benefit every patient,” said David Chassan, Chief Strategy Officer, OUTSCALE, Dassault Systèmes.

The first calls for applications will launch this summer with operational support from both teams.

About OUTSCALE

OUTSCALE, a Dassault Systèmes brand, is the leading sovereign and sustainable operator of Trusted Experience as a Service. We revolutionize the way organizations operate with our virtual twin approach, thereby empowering public organizations and companies across industry sectors to fully harness the power of their data, to optimize their operations and processes while fostering collaboration. At OUTSCALE, we put sovereignty at the heart of our solutions, enabling our clients to have full control over their strategic information while taking advantage of our cyber-governance and cloud experience. As a responsible company, we optimize the energy efficiency of our infrastructure and encourage our clients to adopt sustainable practices.
